

BIONEM-S

SOIL ACTIVATOR
WITH BENEFICIAL FUNGI

Certified in Organic
Agriculture

Enhances
plants
robustness

BIONEM-S is a soil activator in the form of water soluble powder, containing beneficial soil microorganisms which aid in the degradation of the organic matter and the creation of optimal growing conditions of the roots.

STANDARD ANALYSIS

- Beneficial soil microorganisms (fungi) at a population of 1×10^{12} cfu*

CROPS

Vegetables
Horticulture
Herbs
Aromatic plants
Peanuts
Ornamentals
Lawns
Fruit trees
Tuberous crops

PROPERTIES

- It enhances plants resistance against pathogenic nematodes.
- It increases plants resistance against stress caused by biotic factors that affect the root.
- It improves soil conditions for the growth of productive and healthy plants.
- It promotes beneficial microbial soil population.
- It enhances the activity of soil beneficial microorganisms.
- It improves the biological structure of the soil.

PACKAGES

Envelope	20 g	pack of 16 pieces
*Plastic Jar	250 g	box of 24 pieces
*Paper Box	1 kg	box of 10 pieces
*Plastic Pail	5 kg	-
*Cart Box	20 kg	-

*Available upon request

*cfu: colony forming units
