

Biofertilin

NPK 10-4-3

TOTALLY ORGANIC GRANULAR SLOW RELEASE FERTILIZER

BIOFERTIN 10-4-3 is a guaranteed totally natural organic fertilizer, specially designed to offer a large amount of organic nitrogen fully available to the crops. It contributes to the soil fertility in two levels:

- 1) Nutritional Level: Supplies nitrogen and all the other vital elements to the plants in the highest quality and quantity.
- 2) Biological Level: Contributes to the rhizosphere rejuvenation by offering a large amount of organic matter to the soil (metal chelation, growth stimulation).

CHARACTERISTICS INDICATIVE

Total Organic Nitrogen (N)	10 %
Total Phosphorus (P_2O_5)	4 %
Total Potassium (K_2O)	3 %
Humidity	8 %
Organic matter	65 %
Other elements: Calcium, Magnesium, Boron, Iron, Zinc, Manganese, Molybdenum	

USES AND RECOMMENDED APPLICATION RATES

VINEYARDS:	400 to 600 kg/ha in Spring
TREES:	600 to 700 kg/ha in Spring
VEGETABLES :	700 to 1,000 kg/ha at the beginning of each crop
CEREALS :	400 to 800 kg/ha at the beginning of each crop

BIOFERTIN 10-4-3 is designed and it is suitable for the starter fertilization, for the application before planting the plantlets and the transplanting of the crops and for the renewal of the fertilization especially in soils poor in nitrogen. The application period is long and starts from Winter until Spring since there is no question of losing organic elements. Since **BIOFERTIN 10-4-3** is an organic fertilizer, it is recommended to be swept slightly in the soil at maximum depth 15 cm as to achieve further benefits from the natural and biological action of the organic compounds.

It is produced by Humofert SA- 1 Ermou & Theotokopoulou str, 14452, Greece

Organic fertilizer and soil amendment / the access of farming animals in the area is prohibited for at least 21 days after its dispersal in the soil.

Net weight: 25 kg
