

- Specification Sheet -**GROWER 6-24-0**

GROWER 6-24-0 is a liquid NP fertilizer (Nitrogen-Phosphorus) derived from ammonium polyphosphate. **GROWER 6-24-0** is a clear solution totally water soluble which is rapidly absorbed by the plant tissues of leaves and roots.

PROPERTIES AND USES:

- The contained phosphorus is 100% soluble and is immediately available to plants.
- Nitrogen is ammoniacal and as a result it does not leach easily and remains available to the plants for a longer period of time.
- Nitrogen is bound to phosphorus so it does not volatilize easily.
- The contained in GROWER 6-24-0 ammoniacal nitrogen helps plants to use phosphorus more effectively.
- Since phosphorus comes from polyphosphate acid it helps the retention of micronutrients in solution and increases the availability and uptake by the plants.
- Since it is in a liquid form it is easy to handle.

APPLICATION:

GROWER 6-24-0 is applied foliarly and by fertigation.

Application Rate: Generally it is applied at the following application rate.

Foliar application: 7-15 l/ha.

Soil application: 10-45 l/ha.

STANDARD ANALYSIS**(w/w)**

Total Nitrogen (N)	6.0%
Ammonia Nitrogen (N)	6.0%
Phosphorus (P ₂ O ₅)	24.0%

PHYSICAL PROPERTIES:

Appearance:	Cyan fluid
Specific gravity:	1.2-1.5
Solubility:	100% water soluble
pH:	5.7-6.2
